

Mental Health Services Act (MHSA) Consolidated Community Stakeholder Meeting Survey Results Data from Community Stakeholder Online Survey Monkey and Paper Forms Made Available to MHSA Workgroup Participants 2/18/14-1/6/15

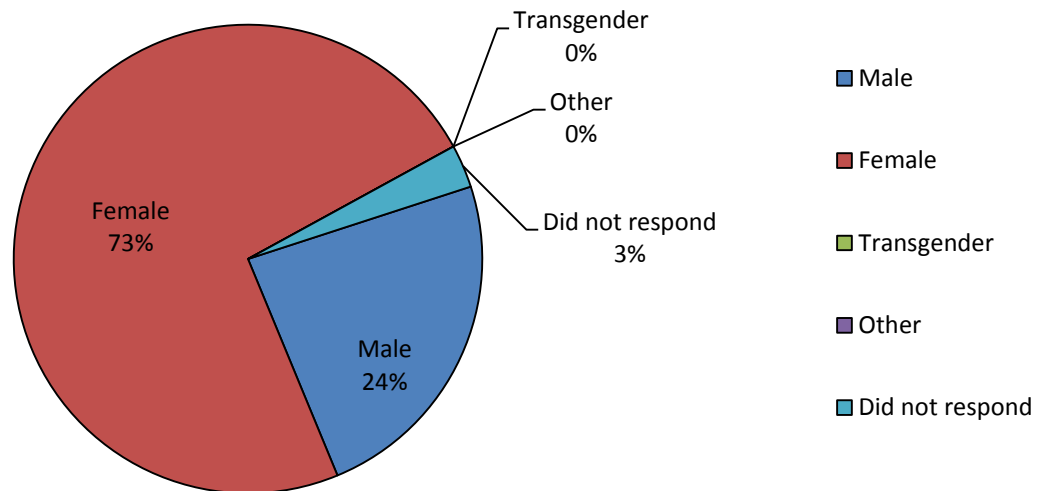

All survey information, both electronic and paper copies, was collected, and the data that follows is a consolidation of the results from both sources. A total of 101 surveys were collected. Please note that some surveys may have been completed by the same people at different meetings, so this is not an unduplicated count. Also, the questions used on the survey were modified partway through this time period, so only responses in common from both versions were included in this report.
